

# EROAD

## 10 WAYS EROAD CAN IMPROVE YOUR FLEET OPERATIONS

Improve the safety of your drivers, vehicle utilisation, servicing and maintenance, reduce fuel costs and simplify RUC admin to improve ROI.

### COMPLIANCE

#### 1. Safe driving

Encourage safe driving with advanced monitoring and reporting and benchmark performance against all EROAD connected vehicles.

#### 2. Safe and Compliant vehicles

Get WoF, CoF and rego notifications, and add personal vehicles that staff use for work purposes.

#### 3. Accurate servicing

Keep your vehicles safe and ready for use. FleetPartners uses EROAD's Service module to track when servicing is due based on date, distance travelled or engine hours.

#### 4. Whole of Fleet

Use the EROAD system to manage all vehicles and assets in your fleet – including trailers and machinery – even if they aren't leased or managed by FleetPartners. is due based on date, distance travelled or engine hours.

### ROAD USER CHARGING

#### 5. Reduce RUC administration

No more paper RUC labels. Licences are automatically updated when RUC is purchased by your FleetPartners team through the EROAD portal.

#### 6. Reduce RUC costs

FleetPartners will purchase RUC in smaller increments, more regularly, freeing up valuable capital for your business. Easily claim refunds for off-road travel.

### COMMERCIAL

#### 7. Reduce fuel costs

Track distance travelled vs fuel fills and highlight inefficient vehicles, identify unauthorised fills, and see where and when vehicles are idling for long periods.

#### 8. Vehicle utilisation

Monitor vehicle use in real time, identify and remove under-utilised vehicles, eliminate unauthorised use.

#### 9. Pool vehicle booking

Make sure your fleet is the right size and right shape for your business, allocate pool vehicle use to cost centres and ensure your fleet is used only for business purposes.

#### 10. Lease optimisation

EROAD's accurate data allows FleetPartners to provide analytics and insights into your fleet utilisation.
