## Fuel Tax Credits

### Claim a Cash Refund on Fuel Tax Credits

Fuel tax credit is available as a cash refund on the fuel tax (excise and/or customs duties) levied on fuel used for selected business activities. The most common is in instances where vehicles are used in 'off-road' activities that are not subject to the fuel tax.

### The Facts

- Automated monitoring of fuel tax eligible trips
- Accurate claims
- Record of mileage to calculate claim
- Comprehensive automated aggregated reporting
- Eliminates admin and paper work
- Auditable substantiation for the claim
- Low cost solution to monitor entire fleet
- Flexible site and project boundaries
- ATO approved (CR2015/13)

LogbookMe fuel tax monitor takes the hassle and administration out of monitoring, calculating and claiming fuel tax credits. Further, the monitoring works automatically in the background without any driver input so your fleet just drives and LogbookMe will calculate the eligible tax credit mileage and produce a periodic report to support the claim.

## Fleet Management

### Harness Live Odometer Readings to Maximise Your Fleet

Accurate odometer readings from vehicles in real time gives fleet managers a new ability to manage the fleet. No need to guess vehicle usage.

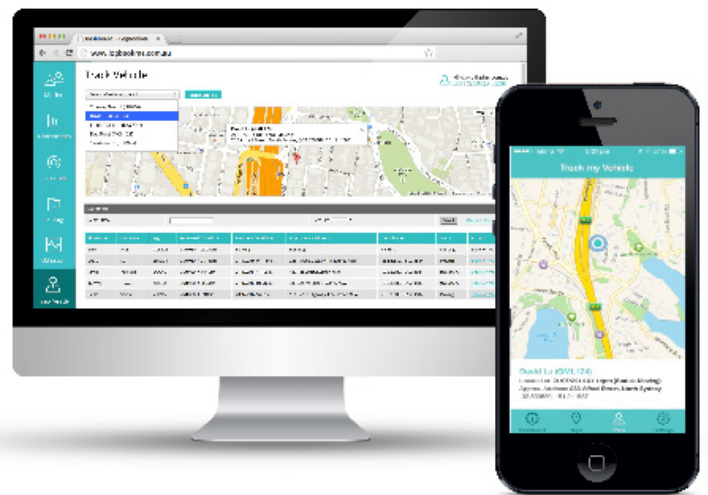

## Vehicle Location

### Locate any vehicle - any time

LogbookMe vehicle locator is an on-demand vehicle finder. This lets both fleet managers and drivers locate a vehicle at anytime whether it's parked, driving or stationary.

### The Facts

- Locate a vehicle at anytime on demand
- Available 24/7
- Track missing or stolen vehicles
- Directions for a driver back to the vehicle (in smartphone app)
- Location accuracy to the nearest 5 metres

### The Facts

- Live accurate odometer for vehicle counted trip by trip
- Accurately schedule servicing, repairs & maintenance
- Proactive management of contract variances, budgeted mileage and extensions
- Optimise residual values

## Fleet Optimisation

### Identify areas for increased fleet efficiency and optimisation

LogbookMe Fleet Analytics gives fleet managers a new level of visibility of how the fleet is used with the view of identifying factors impacting fleet cost, operating costs and inefficiencies.

#### The Facts

- Automated data collection
- Fleet wide comparison
- Customisable filtering from fleet to individual vehicle level
- Comprehensive real time reporting
- Usable intuitive reporting
- Reduce costs by identifying and eliminating unnecessary vehicles
- Ensure correct vehicle mix

Fleet managers can easily view driving durations, trip purpose, vehicle usage and filter by customisable parameters such as cost centre, vehicle pool, vehicle type or by time frames at a broad fleet to an individual vehicle level.

## Driver Scorecard

### Create a Safe Fleet Driving Culture

LogbookMe Driver Safety gives fleet managers visibility over how the fleet is being driven. Real time alerts are available as well as periodic reporting on set parameters such as speeding, braking, acceleration, cornering and impacts. Each time a parameter is met, an event is recorded.

#### The Facts

- Automated data collection
- Fleet wide driver comparison
- Proactively manage drivers in fleet
- Educate and create a safe driving culture
- Manage vehicle warranty validity
- Mitigate incidents
- Reduce behavioral driven operating costs
- Manage insurance risk
- Manage branded vehicles
- Real time email alerts on incidents

Driving Behaviour parameters which we look at include speeding, hard acceleration, hard braking, hard cornering and impacts. When an event occurs the location is also recorded and can be viewed on a map.
